

<Marine Organism Rearing Log>

9 AM, August 15, 2022

Weather: Sunny

Water temperature: 18.5°C

Preparation of the rearing tanks for entering our key stage is progressing smoothly. The photos below show assembling the tanks at different location from the test site and checking for any water leaking. After disassembling them, these tanks will be brought to the test site, then reassembled, and rearing tests will begin.
