

<Marine Organism Rearing Log>

9 AM, August 16, 2022

Weather: Sunny

Water temperature: 18.5°C

Diary of Flounders “It is summer vacation time of what we call “Obon” in Japan. Yet, the heavy homebound traffic or jam-up are none of our business, since we are in the tanks. Scorching heat or typhoons are not our concerns in the cozy place we stay. While many Japanese people enjoy their vacations, we thank our caretakers who clean the tanks, keep the tank water quality stable, and feed us, though.
