

<Marine Organism Rearing Log>

9 AM, September 2, 2022

Weather: Sunny

Water temperature: 17.6°C

Our caretaker's ultimate art. Make an eye contact with a flounder. Check flounders' gill respiration. Look inside the branchia which opens widely at the moment of predation. These are daily health check of the flounders and the transcendent techniques which the caretakers acquired through their experiences during this past half year.
