

<Marine Organism Rearing Log>

9 AM, September 14, 2022

Weather: Sunny

Water temperature: 17.9°C

Following from yesterday, we have carried in about 400 flounders into the tanks in the controlled area. The tanks for rearing test is classified in yellow and blue tanks. The yellow tanks are planned to be added ALPS treated water and the blue ones are to be filled with regular seawater only for comparison. Now, we are reporting rearing test status on this rearing log from next report.
