

<Marine Organism Rearing Log>

9 AM, September 20, 2022

Weather: Cloudy

Water temperature: 18.5°C

We faced a challenge of blackout yesterday due to the distribution network failure at the NPS. An emergency air pump was automatically launched which was equipped beforehand. Furthermore, our caretakers took appropriate actions from accessible power source to restore a part of the facility. We have successfully have full recovery without serious problems this morning.
