

<Marine Organism Rearing Log>

9 AM, September 22, 2022

Weather: Cloudy

Water temperature: 18.2°C

It is the body measurement comparison between the flounders from this spring and the ones from this September (sampling test). The flounders which joined in the tank recently are about 16cm in body length and 36g in weight. The big brothers and sisters are as twice as big in about 33cm and 10 times heavier of 376g.

<Next report will be on September 26, 2022>
