

<Marine Organism Rearing Log>

9 AM, November 2, 2022

Weather: Sunny

Water temperature: 17.7°C

Let us make a report regarding radioactive concentration of ALPS treated water added seawater. As a result of cautiously adding treated water within 1,500Bq/L (on October 3, 2022), the concentration became approx. 1,250Bq/L. Cesium was undetected. Later on, we will add seawater or tritium for the loss from evaporation as needed.
