

<Marine Organism Rearing Log>

9 AM, December 1, 2022

Weather: Cloudy

Water temperature: 18.4°C

“Looks also count” More than 100 days have passed since we had started rearing at the rearing training facility, and it is bothering us that the seawater of the training facility discolored yellowish. Then we are experimenting decoloring by using activated charcoal. We will consider reflecting this in the training facility, while taking into account the decoloring condition or waste volume, etc.
