

<Marine Organism Rearing Log>

9 AM, December 14, 2022

Weather: Sunny

Water temperature: 17.5°C

The graph below shows water quality change after cleaning the nitrification chamber at the rearing training facility. We replaced filtering media on one of 3 nitrification chambers with new one. Ammonia concentration shows little change, however nitric acid concentration temporarily increased. The knowledge we obtained will be reflected on operation of nitrification unit at the rearing training facility.
