

<Marine Organism Rearing Log>

9 AM, December 15, 2022

Weather: Sunny

Water temperature: 17.7°C

Report on the conditions of water quality purification will go on and on (Vol.6). The result of cleaning denitrification unit and removing floating substances, clogging of the pipes is resolved and the water-level difference of upper tank and bottom tank of the denitrification unit has been eliminated. The denitrification unit shows better performance, most likely because bacteria were removed from filtering media.
