

<Marine Organism Rearing Log>

9 AM, January 6, 2023

Weather: Sunny

Water temperature: 17.7°C

Even though we are avoiding density of abalones in the tank, eight of them were found dead from the end of the year 2022 to the beginning of 2023. Though we are transferring them, the effect of better living environment might appear after a certain period of time.

No dead flounders this week.

<Next report will be on January 10, 2023>

The number of dead abalones and abalones removed for research				
	Death		Removed for research	
	12/24-1/6	Accumulated	12/24-1/6	Accumulated
	Regular seawater ①	0	2	0
Regular seawater ②	3	5	0	0
Treated water added ①	1	8	0	0
Treated water added ②	4	10	0	1

*No dead flounders
