

<Marine Organism Rearing Log>

9 AM, January 30, 2023

Weather: Sunny

Water temperature: 17.6°C

The flounders which we started rearing from last fall will be one year old this coming spring. Even though we are rearing them under the same conditions, the size of each flounder is so measurably different. The body color also shows individuality with a contrasting color even though they all look the same. After all, “we are all different...”, isn’t it?
