

<Marine Organism Rearing Log>

9 AM, February 7, 2023

Weather: Cloudy

Water temperature: 17.8°C

We sometimes receive requests from our guests to pet reared marine organisms, however, we regrettably decline. Flounders are astonishingly ferocious and can bite and injure you with their sharp teeth. In addition, abalones are extremely sensitive, and low-temperature burns from human temperature will weaken them.
