

<Marine Organism Rearing Log>

9 AM, February 9, 2022

Weather: Sunny

Water temperature: 17.7°C

Because we were able to take a photo of an abalone in good conditions, so we uploaded it. Since a shocking photo and a creepy photo were consecutively uploaded last Tuesday and Wednesday, please chill with a photo of a relaxed abalone. By the way, the gorgeous shell of abalones are composed of more than 1,000 ceramic-like thin layers less than 0.001 mm thick.
