

<Marine Organism Rearing Log>

9 AM, March 17, 2023

Weather: Cloudy

Water temperature: 18.4°C

It has been just one year since the start of training rearing of our flounders. We encountered various issues since then, including the earthquake occurred on the day we welcomed the flounders, parasitic infestation, etc. But we accumulated the know-how on methods of rearing flounders through those experiences. We will continue to raise flounders with affection.

<Next report will be on March 20, 2023.>

The number of dead abalones and removed for research				
	No. of dead abalones		Removed for research	
	3/10-3/16	Accumulated	3/10-3/16	Accumulated
Regular seawater①	3	17	0	0
Regular seawater②	1	15	0	0
ALPS treated water added①	3	29	0	0
ALPS treated water added②	4	27	0	1

\* For accuracy, counted from Friday of the previous week to Thursday.  
\* No dead flounders
