

<Marine Organism Rearing Log>

9 AM, May 29, 2023

Weather: Rainy

Water temperature: 18.6°C

We will be discussing the names of flounder again, as we did yesterday. In English, besides "Japanese flounder," the flounder is also called "olive flounder," from which the scientific name is originated, or "bastard halibut" since it looks like a halibut. Flatfish is the term used for fishes that are flat and have eyes on one side, including right-eyed flatfish.

For the image of halibut, please refer to the links below.
