

<Marine Organism Rearing Log>

9 AM, July 14, 2023

Weather: Sunny

Water temperature: 17.5°C

We have installed an underwater camera in the tank to view the daily life of the flounder, and we are live-streaming the video on YouTube. Sometimes the flounder bump into the camera and change its angle, resulting in an image that shows nothing. Fine-tuning the position and orientation of the camera is also an important part of the job.

<Next report will be on July 18>

The number of dead abalone / removed for research

	No. of dead abalones		Removed for research	
	7/7-7/13 (No.)	Survival Rate (%, Accumulated)	7/7-7/13	Accumulated (No.)
Regular seawater ①	4	69.0	0	0
Regular seawater ②	0	64.5	0	0
ALPS water added ①	1	63.5	0	0
ALPS water added ②	1	58.6	0	1

\* For accuracy, counted from Friday of the previous week to Thursday.

\* No dead flounder
