

<Marine Organism Rearing Log>

9 AM, July 31, 2023

Weather: Sunny

Water temperature: 17.3°C

We were able to catch abalone biting at feed on video. One was trying to force its way between two other abalone, but was unable to get through. Then they all tried to reach the feed by extending their mouths, and ended up fighting for it. Competition for survival among abalone in the aquarium is just like in the natural world.

Check out the video on X
