

< Marine Organism Rearing Log >

9:00 AM, August 9, 2023

Weather: Sunny

Water temperature: 17.7°C

In this log we continue with our series of photos taken from the flounder and abalone's point of view. Today we photographed what the keeper looks like as seen from the bottom of the tank. When the keeper appears over the tank like this, the flounder starts to fidget, thinking it will be fed.
