

<Marine Organism Rearing Log>

9 AM, November 27, 2023

Weather: Sunny

Water temperature: 18.6°C

Since abalone eat seaweed, such as kelp, in the sea, we mentioned in our February log that we tried feeding commercially-available kelp to abalone when we were practicing rearing them. This was attempted after receiving advice from an abalone expert who said that regular feeding would be effective for maintaining the health of the abalone.
