

<Marine Organism Rearing Log>

9 AM, December 26, 2023

Weather: Sunny

Water temperature: 18.1°C

The frequency of the log will be reduced next year, but the webcam will continue to broadcast 24 hours a day as before. Since lighting for the camera was recently installed, we increased the video transmission rate by 1.5X this week. We will also increase the resolution and make adjustments so that we can transmit clearer images in the future.
